EDUCATION

The College of Idaho

Aug 2023 – May 2027 (Expected)

B.A. in Computer Science & Mathematics and Digital Marketing | Minor in Arts | GPA: 3.768 | Dean's List: 3 Years

Relevant Coursework: Statistical Machine Learning, Data Analytics, Design & Analysis of Algorithms, Multiple Regression Analysis, Linear Algebra, Discrete Mathematics, Software Engineering & Senior Design

TECHNICAL SKILLS

Languages: Python (Proficient), R (Proficient), SQL (Intermediate), JavaScript (Intermediate), HTML/CSS (Intermediate), C++ (Basic)

ML & Data: Gradient Boosted Trees, Logistic/Linear Regression, KNN, Cross-Validation, Feature Engineering, EDA, AIC Feature Selection

Frameworks & Tools: FastAPI, tidyverse, tidymodels, ggplot2, SQLite, Git, Tableau, Microsoft Office Suite, LLM APIs (OpenRouter, Anthropic, OpenAI)

PROJECTS

AI Fan Engagement Agent | Software Engineering & Senior Design A — Course Final 2024

Python, FastAPI, SQLite, OpenRouter API, HTML/CSS/JS

- Built a full-stack web app where sports fans chat with an AI agent, take AI-generated quizzes, and predict game outcomes
- Designed an agentic backend using FastAPI that routes user input to the appropriate tool including chat, quiz generation, prediction, and reward tracking
- Built a persistent memory system using SQLite and integrated OpenRouter API to power the LLM agent

Predictive Modeling Hackathon | MAT427 Statistical Machine Learning 2025

- Built and optimized Gradient Boosted Trees classification models on an imbalanced dataset; tuned trees to reduce overfitting
- Performed feature selection using Stepwise AIC, treated missing values as meaningful categories, and used EDA to guide modeling decisions

College Admissions & Retention Analysis | MAT427 Statistical Machine Learning 2025

- Analyzed anonymized admissions data (2022-2024) for the College of Idaho to identify factors influencing student attendance and transfer behavior
- Cleaned and transformed messy real-world datasets, engineered features, and managed sparse categorical variables

Statistical Research — Financial Wellbeing Predictors | MAT212 Multiple Regression Analysis 2024

- Collected and cleaned a real dataset to identify how education level and age predict financial wellbeing outcomes
- Built multiple regression models in R, validated findings through literature review, and presented results formally

WORK EXPERIENCE

Campus Safety Office Assistant | The College of Idaho, Caldwell, ID Mar 2024 – Present

- Serve as first point of contact for campus safety calls handling emergencies, security concerns, and general inquiries
- Support officers during routine patrols and monitor building access; developed strong situational judgment in fast-paced on-call setting

Data Entry Operator | Nepal Red Cross Society, Kathmandu Aug – Sep 2022

- Managed and entered donor health records for blood bank operations, maintaining accuracy across a high-volume dataset
- Contributed to a nationwide blood donation campaign through meticulous data handling and quality checks

CERTIFICATIONS

Google Ads Display Certification — Google Apr 2026 – Apr 2027

HubSpot Social Media Certification — HubSpot Academy Sep 2025 – Oct 2027

Digital Marketing Certification — Stukent May 2026

AWARDS & LANGUAGES

Awards: Dean's List — Academic Excellence, College of Idaho (3 consecutive years) | Winner, Interschool Robotics Event (2021)

Languages: English (Fluent) | Nepali (Fluent) | Hindi (Fluent)
